VOLUME 47: INDEX TO TITLES

A

AA amyloidosis, causing diffuse interstitial lung disease: *short report*, **323**

Abdominal surgery
- elective, value of physiotherapy before, **249P**
- postoperative chest infection, not influenced by salbutamol, **249P**

Acculevel compared with HPLC for plasma theophylline estimation, **255P**

Acetazolamide, does not inhibit cough responses to chloride deficient challenge, **234P**

Achilles tendon rupture, underrated complication of corticosteroid treatment: *correspondence*, **484**

Actinomycosis, endobronchial, mimicking pulmonary neoplasm: *short report*, **664**

Adenocarcinoma
- arising in mucinous cystadenoma of the lung: *short report*, **129**
- primary pulmonary, and alveolar atypical hyperplasia, clinicopathological study of 10 cases, **1041**

Adenosine 5'-monophosphate, with inhaled loop diuretics, in asthma, time course of change in bronchial reactivity, **872P**

Adrenaline
- intravenous, in normal, atopic and asthmatic man, bronchial responsiveness, **256P**
- and salbutamol, comparison of bronchodilator potencies and effects on bronchial reactivity in mild asthmatic subjects in vivo, **874P**

Adult respiratory distress syndrome, 651
- endotoxin, antiendotoxin core antibodies, and oxygen requirement, **245P**
- future treatment, cellular mechanisms: *editorial*, **260**: *correspondence*, **668**
- initial experience of artificial surfactant therapy, **243P**
- neutrophil elastase levels and oxygen requirement, **245P**

Aeromonas hydrophila fulminant pneumonia, in a fit young man: *short report*, **482**

Aerosol inhalers, orifice size, respirable fraction and clinical response in relation to, **239P**

Africa, rural, pulmonary disease statistics, **228P**

Age
- and height adjustment for cross sectional studies of lung function, children, 6-11 years, **707**
- relation to serum elastin peptide concentration, working men, **937**

AIDS
- antiretroviral treatment modifies phenotype of alveolar macrophages, **223P**
- and bronchopulmonary Kaposi's sarcoma, **721**, **726**
- diagnostic value of 99mTc DTPA clearance: *correspondence*, **138**
- and the lung: update 1992, **305**, **381**
- multinucleated cells in bronchoalveolar lavage, **240P**
- related primary intrathoracic lymphoma, **223P**
- *Rhodococcus equi* causing endobronchial mass with lung abscess: *short report*, **62**
- and tuberculosis, is the "white plague" up and coming? **223P**
- *see also* HIV

Air transport and fate of pneumothorax in pleural adhesions: *short report*, **833**

Airflow limitation
- chronic
  - cognitive functioning, pulmonary physiology, and quality of life, **865P**
  - interrelations among physiological and psychological function, **850P**

ventilation perfusion scans, **881P**
Cyclic GMP, urinary, in obstructive sleep apnoea, **878P**
Cyclooxygenase inhibition modulates change in bronchial reactivity to methacholine with inhaled frusemide in normal subjects, **853P**
Cyclosporin A, and dexamethasone, effects on T lymphocytes in vitro in chronic severe asthma, **873P**
Cysteine levels in bronchoalveolar lavage and lung tissue, effect of high dose *N*-acetylcysteine, **246P**
Cystic fibrosis
in a 70 year old woman: *short report*, **202**
acute severe deterioration associated with influenza A virus infection, **112**
addition of exercise to physiotherapy, effect on sputum expectoration and lung function, **867P**
adults, serum IgG antibodies to *P cepacia*, **252P**
airflow obstruction, TNF-alpha and leukotrienes, **868P**
airway epithelial chloride channel which functions normally, **868P**
airways, obtained at heart-lung transplantation, bioelectric properties, **1010**
antibiotic prescribing practices, UK and Ireland, **252P**
cachexia, TNF-alpha and resting energy expenditure, **868P**
chronic supplemental enteral nutrition via nasogastric route, **866P**
comparison of clinical features in patients with different genotypes, **866P**
cost of care: *editorial*, **673**; *paper*, **684**
current survival and population estimates to the year 2000: *correspondence*, **327**, **400**
effect of positive expiratory pressure breathing: *correspondence*, **66**
and emphysema, comparison of six minute walk test performance, **862P**
end stage respiratory disease, heart-lung transplantation, **248P**
extrapulmonary sites of *P aeruginosa*, adults, **426**
Flutter VRP1 device, evaluation in young adults, **237P**
glutathione state in adults, **866P**
increased incidence of *Pseudomonas cepacia* infection in adult centre, **866P**
infection with mucoid *Pseudomonas aeruginosa*, role of alginate, **6**
lung disease, role of viral infections: *editorial*, **69**
nebulised amiloride trial, **867P**
P aeruginosa infection, seasonal onset, **109**
predictors of survival of patients awaiting heart-lung transplantation, and assessment of postoperative survival, **247P**
related diabetes mellitus, prevalence and insulin responses in adults, **866P**
respiratory exacerbations, intravenous ceftazidine and aztreonam compared, **867P**
somatic gene therapy, recent advances, **315**
vitamin A and E concentrations, **867P**
Cytochrome C and *S pneumoniae* interference with oxidative response of neutrophils, **869P**
Cytokines
immunoreactivity, in normal human nasal mucosa, **896P**
serum, in acute severe asthma, acute myocardial infarction, and stable asthma, **870P**
Cytolytic T cells, generation in *M tuberculosis* infection and vaccinated with BCG, **695**
Cytomegalovirus pneumonitis, severe, in HIV infected patients with higher than average CD4 counts, **301**
Cytoskeletal peptides, expression in resected non-small cell lung cancer, **249P**

D
Deep vein thrombosis, and/or pulmonary embolism, four weeks' versus three months' anticoagulation, **217P**
Defensins, ancient but potentially dangerous weapons in the armoury, **195**
Der p1 levels six months after treatment of houses with liquid nitrogen, **219P**
Desmoid tumours, treatment, in Gardner's syndrome: *short report*, **662**
Dexamethasone
and cyclosporin A, effects on T lymphocytes in vitro in chronic severe asthma, **873P**
treatment, effect on TNF in bronchoalveolar secretions in respiratory distress syndrome, infants, **44**
Diabetes mellitus, and cystic fibrosis, prevalence and insulin responses in adults, **866P**
Dialysis, and pulmonary function in chronic renal failure: *correspondence*, **763**
Diaphragm fatigue
caused by sustained maximum voluntary ventilation, **858P**
and hypercapnia, in patients with a thoracoplasty, **880P**
Diaphragmatic paralysis, bilateral, neck osteopathy causing: *short report*, **201**
Diaphragmatic strength in chronic heart failure, **216P**
Diaphragmatic thickness-respiratory muscle strength relationship, evaluation by ultrasound, **215P**
Diathermy resection, bronchoscopic, for tracheobronchial obstruction, **886P**
Diffuse interstitial lung disease, due to AA amyloidosis: *short report*, **323**
Digitalisation, prophylactic, in pulmonary surgery, **41**
Diskhalers, determinants of inspiratory flow rate, **239P**
DNA
amplification for *P carinii* from saline mouth rinse, **857P**
mycobacterial
amplification, IS6110 and 65kDa antigen gene compared, tuberculosis diagnosis, **690**
detection in tuberculous pleurisy by polymerase chain reaction, **265**
Domiciliary oxygen treatment, East Anglian GP survey, **864P**
Domiciliary ventilation in chronic obstructive lung disease: *editorial*, **334**
effects on sleep and quality of life, **342**
Donor lung lavage, value in identification of postoperative infection following lung transplantation, **248P**
Dopaminergic stimulation, effects on airway dynamics and respiratory muscle strength in Parkinson's disease, **880P**
Doxapram, *v* nasal ventilation, in treatment of type II respiratory failure complicating chronic airflow obstruction, **858P**
Drug delivery to lung, controlled, use of liposomes: *editorial*, **257**
Dyspnoea, assessed by visual analogue scale, in chronic obstructive lung disease during progressive and high intensity exercise, **363**

E
Eicosanoid production by leucocytes in airways disease, **242P**
Eicosapentaenoic acid, exogenous, effects on in vitro eosinophil generation of leukotriene C, **241P**
Elastase
activity, and sputum sol phase proteins, in clinically stable bronchiectasis, **88**
inhibitors, effects on extracellular proteolysis by neutrophils, **246P**
Elastin peptide, serum concentration, relation to age, FEV_1, smoking habits, alcohol consumption, and protease inhibitor phenotype, working men, **937**
Emphysema
and cystic fibrosis, comparison of six minute walk test performance, **862P**
measurements, microscopic and macroscopic, relation to carbon monoxide gas transfer, **144**
and normal subjects at standardised airflows, lung sound intensity, **674**
and single lung transplantation
α_1 antitrypsin deficiency, **248P**
ventilation-perfusion relationships, **248P**

treatment, **851P**
Empyema thoracis, surgical treatment, analysis of 88 cases, 1987-1991, **851P**
Endobronchial actinomycosis mimicking pulmonary neoplasm: *short report*, **664**
Endobronchial mucormycosis lesion, removal through rigid bronchoscope: *short report*, **203**

Endobronchial obstruction, malignant, endoscopic photodynamic therapy, **251P**
Endobronchial radiotherapy, medium dose rate, with caesium-137: *new techniques*, **474**
Endobronchial sonography, feasibility and preliminary results: *new techniques*, **565**
Endoscopic Nd YAG laser treatment for obstructive tracheal lesions, **250P**
Endoscopic photodynamic therapy for malignant endobronchial obstruction, **251P**
Endoscopy assisted microthoracotomy: *editorial*, **489**; **850P**
initial experience, **490**
Endotoxin in bronchoalveolar lavage fluid, assay in rapid diagnosis of Gram negative pneumonia, **547**
Eosinophilic lung disease, cocaine induced: *short report*, **478**
Epidermal growth factor receptor expression, and non-small cell lung cancer survival, **860P**
Epithelial cells
alveolar, and liposomes, comparison of effects of oxidants, **246P**
permeability
effect of cigarette smoke condensate, **245P**
effect of NO_2 on TNF synthesis, **245P**
Epithelial $\gamma\delta$ T cells in lung infections, **253P**
Epithelium, tracheal, endothelin, vasopressin, and substance P like immunoreactivity, rabbit, **1044**
Exercise
and asthma, suitable case for rehabilitation: *editorial*, **765**
gas exchange during, transcutaneous oxygen and carbon dioxide tensions, **848P**
induced asthma
airway microvasculature: *occasional review*, **748**
attenuation by local hyperthermia, **592**
effect of mask to modify inspired air temperature and humidity, **446**
and inhaled frusemide, evidence of role for inhibitory prostanoids, **797**
performance, and body composition, in chronic obstructive pulmonary disease: *correspondence*, **66**
and right to left shunt in pulmonary arteriovenous malformations, **790**
testing, incremental, two protocols compared, **210P**
Expansible cannula, new technique for chest drain insertion: *technical note*, **657**
Expiratory positive airway pressure, role during nasal ventilation, **858P**
Expiratory pressure, reduced, effect on pharyngeal size during nasal positive airway pressure in sleep apnoea, **809**
Extracellular proteolysis by neutrophils, effects of elastase inhibitors, **246P**
Extrinsic allergic alveolitis
caused by goose feathers in a duvet: *short report*, **990**
do interleukin-6, IgG or CD23 provide evidence for B cell activation, **214P**
early immune response as assessed by analysis of bronchoalveolar fluid, **214P**

F
Fat rich versus carbohydrate rich loads, effect on gas exchange and walking performance in chronic obstructive lung disease, **451**
Fenestrated cup biopsy forceps, for percutaneous visceral pleural biopsy: *technical note*, **753**
Fenoterol
cardiovascular effects under conditions of hypoxaemia, **814**
and death from asthma, New Zealand, 1981-7: *correspondence*, **400**, **574**
Fibroblast activation in fibrosing alveolitis, lung injury and inflammatory mediators, **1064**
Fibroblasts, pulmonary, effect of heparin, **634**
Fibrosing alveolitis
associated with systemic sclerosis, high resolution computed tomography, **218P**
fibroblast activation, lung injury and inflammatory mediators, **1064**
high resolution computed tomography assessment and ^{99m}Tc DTPA compared, **218P**
high resolution computed tomography correlates with BAL cell profiles, **218P**
Fibrosis, subepithelial, in asthmatic airways, **854P**
Fibrotic lung disease, assessment of types I and III procollagen peptide levels in bronchoalveolar lavage fluid and serum as markers, **219P**
Fish oil supplements, dietary, effects on seasonal asthma in pollen sensitive asthmatics, **885P**
Fluoxetine, effects on sleep and breathing in obesity, **235P**
Fluticasone propionate
compared with budesonide, in adult asthma, **891**
LTE4 excretion, bronchoconstriction and airway hyperreactivity after, **895P**
Flutter VRP1 device
use in post-thoracotomy patients, **236P**
in young adults with cystic fibrosis, evaluation, **237P**
Forced expiratory volume
decline, bronchial reactivity, smoking and atopy, **221P**
decline in CAO, **221P**
Forced oscillation techniques for measuring mechanical properties of the respiratory system, **317**
Formoterol, inhaled
comparison of cardiovascular and metabolic effects with salbutamol and fenoterol, **882P**
time course of bronchodilating effect, **30**
***N*-Formyl-methionyl-leucyl-phenylalanine** inhalation
effects in well elderly and chronic bronchitis, **279**
haematological effects, **284**: *correspondence*, **763**
Free radical activity
circulating, in cryptogenic fibrosing alveolitis, **219P**
serum concentrations, in BCNU related pulmonary fibrosis, **219P**
Frusemide
and allergen induced contractions of passively sensitised human bronchi, evidence of role for prostaglandin E2, **895P**
effect on allergen induced contractions of passively sensitised human bronchi in vitro, **872P**
inhaled, and exercise induced asthma, evidence of role for inhibitory prostanoids, **797**

G
Gardner's syndrome, desmoid tumours, treatment: *short report*, **662**
Gas exchange
and collateral ventilation, normal lung, **211P**
during exercise, transcutaneous oxygen and carbon dioxide tensions, **848P**
Gastro-oesophageal reflux and asthma, pH measurements, **881P**
General practitioners, and asthma: *editorial*, **669**
Glucocorticoid induced peptide, and changes in neutrophil motility, shape and adhesiveness, **860P**
Glucocorticoids and allergic rhinitis, **231P**
Glutaraldehyde, double blind inhalation challenge testing technique, **889P**
Glutathione
levels in bronchoalveolar lavage and lung tissue, effect of high dose *N*-acetylcysteine, **246P**
state in adults with cystic fibrosis, **866P**
Goose feathers in a duvet, causing extrinsic allergic alveolitis: *short report*, **990**
Gram negative pneumonia, rapid diagnosis by assay of endotoxin in bronchoalveolar lavage fluid, **547**
Granulocyte macrophage colony stimulating factor expression in bronchial epithelium in asthma, **852P**
Grass pollen immunotherapy
effect on cutaneous mast cell subtypes and immediate sensitivity to allergen and histamine, **871P**
effect on cytokine mRNA expression during allergen induced late cutaneous responses, **871P**
Growth factor, platelet derived growth factor-B in alveolar macrophages, anti-inflammatory drugs increase mRNA, **893P**

H
Haematopoietic growth factors, and lung cancer treatment, **119**
***Haemophilus influenzae*, non-typable**
culture filtrates slow ciliary beat frequency, **868P**
fimbriae, adherence to HTBM and mucin glycopeptides, **252P**
fimbriation of clinical isolates increases adherence, **859P**
and inhibition of neutrophil locomotion, **868P**
protective effects of subminimal antibiotic concentrations, **859P**
Halothane, subanaesthetic dose, and sustained hypoxia, **879P**
Hamartomas, multiple cystic pulmonary: *short report*, **1076**
Heaf test reaction, positive, and prediction of later breakdown of tuberculosis, Asian schoolchildren, **776**
Health service employees, and tuberculosis, **224P**
Heart failure
chronic
bronchial hyperresponsiveness, airway calibre and atrial natriuretic peptide, **881P**
effect of ambulatory oxygen treatment on symptoms and exercise capacity, **858P**
with sleep disordered breathing, controlled trial of nasal CPAP, **216P**
Heart-lung transplantation
in cystic fibrosis, predictors of survival in patients awaiting, **247P**
cystic fibrosis airways obtained at, bioelectric properties, **1010**
for end stage respiratory disease in cystic fibrosis, **248P**
medium term results, **247P**
steroid therapy and airway complications following, **248P**
Height and age adjustment for cross sectional studies of lung function, children, 6-11 years, **707**

Helium dilution, to assess static lung volumes in healthy subjects during occlusion of one mainstem bronchus, **848P**
Heparin, effect on pulmonary fibroblasts and vascular cells, **634**
Hepatopulmonary syndrome, new name, old complexities: *editorial*, **897**
Hereditary respiratory diseases, somatic gene therapy, recent advances, **315**
High resolution computed tomography
appearances can identify labile disease in fibrosing alveolitis associated with systemic sclerosis, **218P**
appearances correlate with bronchoalveolar lavage cell profiles in fibrosing alveolitis, **218P**
assessment, and ^{99m}TC DTPA clearance, relationship in fibrosing alveolitis, **218P**
Hip fracture, interaction between current smoking, leanness, and physical inactivity in prediction, **861P**
Histamine
and bradykinin
and cholinergic pathways, nasal responses, **894P**
comparative nasal effects, **232P**
nasal challenge, changes in mucosal blood flow and airways resistance after, **894P**
bronchial challenge, in symptom free textile workers, as measured by dose response, **889P**
bronchial responsiveness, relation to bronchoconstriction after inhaled lipopolysaccharide, **288**
challenge in allergic rhinitis, **231P**
induced bronchoconstriction
inspiratory muscle strength and endurance during, **922**
in mild asthma, caffeine decreases, **889P**
HIV disease, pulmonary complications, recent developments in management, **381**: *correspondence*, **1084**
HIV infection
advanced, and persistent alveolar increased permeability to ^{99m}Tc DTPA: *correspondence*, **575**
asymptomatic, PCR detection of *P carinii*, **223P**
HIV positive patients
acute respiratory illness, investigation using indium-111 labelled polyclonal immunoglobulin scans, **240P**
changing patterns of respiratory disease, 1986-7 and 1990-1, **854P**
diagnosis of *P carinii* pneumonia by simple outpatient assessments, **1005**
with higher than average CD4 counts, and severe cytomegalovirus pneumonitis, **301**
tine testing, **877P**
Horseshoe lung with left lung hypoplasia: *short report*, **205**
House dust mite allergen, Der p1, in South Manchester homes, absence of seasonal variation in concentrations, **928**
5-Hydroxytryptamine
in inhibition of amiloride sensitive transport, **233P**
and sensitivity of cough reflex, **895P**
Hypercapnia
/hypoxaemia, cardiovascular effects of isoprenaline, **856P**
in obstructive sleep apnoea, effects of posture on flow-volume curves, **524**
related to diaphragm fatigue, in patients with a thoracoplasty, **880P**
Hypercapnic respiratory failure, acute, in chronic obstructive lung disease, **34**
Hyperinflation, inspiratory muscle strength and endurance during, **922**
Hyperthermia, local, and attenuation of exercise induced asthma, **592**
Hypertonic saline and bradykinin challenges in asthma, cross refractoriness between, **873P**
Hypothalamic-pituitary-adrenal function, in CAO, effect of BDP and prednisolone, **229P**
Hypoxaemia
breathlessness, and survival, community study, **847P**
and cardiovascular effects of fenoterol, **814**
/hypercapnia, cardiovascular effects of isoprenaline, **856P**
nocturnal, prediction, after thoracoplasty, **879P**
refractory, after pneumonectomy, transoesophageal echocardiography: *short report*, **60**: *correspondence*, **575**
Hypoxaemic chronic obstructive airways disease, short term effect of oxygen on renal haemodynamics, **550**
Hypoxia
acute and chronic, effects on secretion of vasopressin, renin, and aldosterone, **846P**
chronic, effects on contractility of pulmonary resistance vessels, **225P**
directly causes pulmonary vascular smooth muscle to relax, **224P**
effect of hyperinflation on pulmonary artery pressure, **892P**
hypobaric and normobaric, rats, **892P**
induced pulmonary vasoconstriction in isolated pulmonary arteries, **225P**
induces endothelial cells to produce growth factor and chemoattractant for fibroblasts, **225P**
influence of mechanical limitation on responses to, **211P**
pulmonary reactivity changes, **226P**
in resolution of pulmonary hypertension, pulmonary vascular remodelling and right ventricular hypertrophy, **227P**
and sodium retention, in chronic obstructive pulmonary disease, **847P**
vasoconstriction, endothelium dependent, **226P**
vasorelaxant effect of lemakalim on pulmonary arteries, **227P**
and water retention, in chronic obstructive pulmonary disease, **846P**
Hypoxic pulmonary vasoconstriction of isolated porcine lungs is not dependent on changes in endogenous NO release, **893P**

I
Idiopathic pulmonary haemosiderosis, form of microscopic polyarteritis: *short report*, **988**
Idiopathic thrombocytopenic purpura, without underlying lung disease, and invasive aspergillosis: *correspondence*, **328**
IGF-1 gene expression, increased, and right ventricular hypertrophy in chronically hypoxic rats, **858P**
Immunoglobulin G, nebulised, as adjunctive therapy for bronchiectasis, **894P**
Immunoglobulin replacement therapy, asthma, **254P**

Mesothelioma
localised fibrous, arising in an intralobar pulmonary sequestration: *short report*, **837**
malignant, Portsmouth, 1982-91, **851P**
malignant pleural, surgeon's role, **851P**
Metabisulphite, in asthma, effect of amiloride on airway response, **872P**
Meter dose inhaler, pressurised, and Bricanyl Turbohaler compared, in adult asthmatics, **238P**
Methacholine
airway hyperreactivity, **885P**
airway responsiveness, and urinary sodium excretion, **856P**
challenge, repeatability, asthmatic children, transcutaneous oxygen tension, **804**
induced bronchoconstriction
and dose-response relation of nebulised salbutamol, **873P**
effect on spectral characteristics of breath sounds in asthma, **680**
effects on cough receptor sensitivity to inhaled capsaicin and tartaric acid, **441**
wheeze, airflow and lung volume, relationship between, **253P**
with inhaled frusemide, and cyclooxygenase inhibition, **853P**
log dose-response curve slope, relationship to sensitivity to, and starting airway calibre, **242P**
reduced subjective awareness of bronchoconstriction provoked by, elderly, **410**
responsiveness, and peak expiratory flow, in aluminium potroom asthma diagnosis, **292**
Methotrexate
low dose
for rheumatoid arthritis, and acute pneumonitis, **628**
Pneumocystis carinii complicating: *correspondence*, **67**
in steroid dependent asthma, long term results, **254P**
Microbial flora of the trachea during intubation for upper abdominal surgery, **818**
Microthoracotomy, endoscopy assisted: *editorial* **489**, **850P**
initial experience, **490**

Mini-Wright peak expiratory flow meter, non-linearity, effect on calculation of diurnal variation, **891P**
Mini-Wright peak flow meter performance, changes after prolonged use, **890P**
MKS 492, inhaled, bronchodilator effectiveness assessed in normal human subjects, **242P**
Morning symptoms, nocturnal symptoms, and night time inhaler use in asthma, **861**
Mucinous cystadenoma of the lung, and adenocarcinoma: *short report*, **129**
Mucociliary function, ciliary ultrastructure, and ciliary orientation, in Young's syndrome, **184**
Multinucleated cells in bronchoalveolar lavage from AIDS patients, **240P**
Multiple cystic pulmonary hamartomas: *short report*, **1076**
Multivariate analysis, and reduction of number of intermediate V:Q scans, **236P**
Muscle
biopsy specimens, and respiratory disease in SLE, **957**
respiratory and quadriceps, strength in chronic adult onset asthma, **216P**
Myasthenia gravis, repetitive stimulation of phrenic nerves, **640**
Mycobacteria
non-tuberculous, Nottingham 1979-91, **875P**
opportunistic infection, in bronchiectasis, **251P**
Mycobacterium kansasii and *M tuberculosis*
clinical features compared, **876P**
pulmonary infections, radiography compared, **876P**
Mycobacterium malmoense and *M tuberculosis*, pulmonary infections, radiography compared, **875P**
Mycobacterium tuberculosis
drug resistance, Karachi, Pakistan, **227P**
infection, vaccinated with BCG, generation of cytolytic T cells, **695**
specific antibody, measurement in pulmonary tuberculosis, clinical value, **270**
Myocardial infarction
oesophageal dissection after thrombolytic treatment: *short report*, **835**
stable, serum cytokines and salivary platelet aggregation factor, **870P**

N
***N*-Acetylcysteine**, high dose, effect on glutathione and cysteine levels in bronchoalveolar lavage and lung tissue, **246P**
Nasal breathing
obligate, adults, **236P**
preferential, adults, lung function testing, **719**
Nasal cannulas, variability of inspired oxygen concentrations, **609**; *correspondence*, **1086**
Nasal challenge with bradykinin and histamine, airway and blood flow changes, **894P**
Nasal continuous positive airway pressure, domiciliary, in obstructive sleep apnoea, **878P**
Nasal intermittent positive pressure ventilation, in chronic respiratory failure, **859P**
Nasal mucosa, normal human, cytokine immunoreactivity, **896P**
Nasal mucous membrane, in allergic rhinitis, infiltration by lymphocytes, **232P**
Nasal ventilation
role of expiratory positive airway pressure, **858P**
to facilitate weaning in patients with chronic respiratory insufficiency, **715**
v doxapram, in treatment of type II respiratory failure complicating chronic airflow obstruction, **858P**
see also Nose
Nebulised bronchodilator therapy in hospital, cost effectiveness of education, **240P**
Nebuliser compressor service, district, costs, **863P**
Nebulisers, home
assessment of patients, survey of present practice in Yorkshire, **863P**
lung function and symptom scores during three years, **863P**
provision, Yorkshire, **863P**
Neck circumference, and other clinical features, in obstructive sleep apnoea syndrome diagnosis, **101**
Neck osteopathy causing bilateral diaphragmatic paralysis: *short report*, **201**
Nedocromil sodium
aerosol and dry powder compared, in exercise induced asthma, **230P**
effect on leucocyte migration in normal and asthmatic leucocytes, **243P**
inhibits histamine release within proximal asthmatic airways in vivo, **212P**
Neural stimulation, differential responses of pulmonary arteries, **226P**
Neuropeptides, differential responses of pulmonary arteries, **226P**
Neutrophilic alveolitis in Sweet's syndrome: *short report*, **572**
Neutrophils
elastase levels and oxygen requirement after multiple trauma, **245P**
peripheral blood, novel, rapid technique for isolating, in vitro function and in vivo migration in the lungs, **243P**
rheology, impaired, early event in acute lung injury, **244P**
New perspectives on basic mechanisms in *lung disease*, **1063**, **1064**
Nicotine patches *v* placebo, 234 hospital patients, **886P**
Nilutamide pneumonitis, eight patients, **622**
Nitric oxide release, inhibited by L-NAME, vascular effects, **891P**
5-Nitro-2-(3-phenylpropylamino) benzoic acid, a chloride channel "blocker" which alters channel gating, **233P**
Nitrogen dioxide, effect on synthesis of tumour necrosis factor α by human bronchial epithelial cells in vitro, **245P**
Nocturnal symptoms, morning symptoms, and night time inhaler use in asthma, **861P**
Non-adrenergic, non-cholinergic nervous system, role in overnight variation of airway calibre in asthma, **243P**
Non-small cell bronchogenic carcinoma, preoperative computed tomography of brain, **106**
Non-small cell lung cancer
expression of different cytoskeletal peptides, **249P**
perioperative staging, practice of cardiothoracic surgeons: *editorial*, **1**, **3**; *correspondence*, **327**
survival, in relation to epidermal growth factor receptor expression, **860P**
Normal healthy subjects, how normal is normal, **240P**
Normocapnia, in obstructive sleep apnoea, effects of posture on flow-volume curves, **524**
Nose
in study of inflammatory response of respiratory tract: *editorial*, **993**
see also Nasal
Nosocomial pneumonia, in the intensive care unit, mechanisms and significance, **465**
Notices, **67**, **139**, **206**, **328**, **484**, **576**, **761**, **844**
Nucleolar organiser regions as marker of growth rate in squamous cell carcinoma of the lung, **778**
Nutritional support in chronic obstructive lung disease: *editorial*, **141**

O
Obstructive airways disease, bronchodilator response, interpretation, **429**
Obstructive sleep apnoea
airway assessment, somnofluoroscopy, computed tomography, and cephalometry, **150**
basal metabolic rate, **878P**
and bodybuilders with large necks, **879P**
breath holding time, **880P**
domiciliary nasal continuous positive airway pressure, **878P**
effects of nasal CPAP, **235P**
effects of posture on flow-volume curves during normocapnia and hypercapnia, **524**
habitual snoring with and without, importance of cephalometric variables, **157**
neck circumference and other clinical features in diagnosis, **101**
night time blood pressure, **216P**
phase angle changes and breathing, **879P**
in single lung transplant recipients, **878P**
urinary cyclic GMP, **878P**
Oesophageal atresia, and tracheo-oesophageal fistula, repaired, lung function abnormalities, **1030**
Oesophageal carcinoma, surgical treatment, and Laurence O'Shaughnessy: *correspondence*, **842**
Oesophageal dissection after thrombolytic treatment for myocardial infarction: *short report*, **835**
Oilseed rape, and bronchial reactivity and IgE, **885P**
Oncology ward, paediatric, pseudo-outbreak of tuberculosis, **220P**
O'Shaughnessy, Laurence, at Dunkirk 1940: *correspondence*, **842**
Osteomyelitis, vertebral, presenting with pleuritic chest pain and bilateral pleural effusions: *short report*, **395**
Osteoporosis
corticosteroids, and bone disease, oral and intravenous bisphosphonates compared, **854P**
involutional and corticosteroid associated, and vertebral fractures: *correspondence*, **207**
Oximetry, 24 hour ambulatory, to monitor response to assisted ventilation with NIPPV, **215P**
Oxitropium, in COPD, predictors of symptomatic and functional benefit, **865P**
Oxitropium bromide
and ipratropium bromide compared, bronchodilator effect, **865P**
and salbutamol, effect on oxygen desaturation in COPD, **211P**
Oxygen
concentrations, inspired, in nasal cannulas, variability, **609**: *correspondence*, **1086**
concentrators
assessment for prescription and reassessment, **222P**
clinical description of those prescribed, England and Wales, **221P**
and jet mixing devices, **1060**
prescription, **847P**

delivery, transtracheal: *new techniques*, **57**
liquid, portable, and exercise ability in severe respiratory disability, **781**
liquid and gaseous compared, for domiciliary portable use, **98**
masks, misleading labelling and packing, **543**
saturation changes after nebulised salbutamol in acute asthma, **220P**
short term effect on renal haemodynamics in hypoxaemic chronic obstructive airways disease, **550**
supplementation, intravascular, **215P**
tension, transcutaneous, gas exchange during exercise, **848P**
therapy
domiciliary
East Anglian GP survey, **864P**
long term, community management, outline plan, **864P**
long term, short term variability of saturation in patients being assessed for, **864P**
transport, relation between oxygen delivery and consumption, **971**
uptake kinetics, applied to COPD, **210P**
Oxygenation, brain tissue, in chronic obstructive lung disease, effect of aminophylline, **1025**

P
Paediatric oncology ward, pseudo-oubreak of tuberculosis, **220P**
Pamidronate, intravenous, for osteoporosis associated with corticosteroid dependent lung disease, **932**
Pancreatic carcinoma, retroperitoneal silicosis mimicking, in Alpine miner with chronic lung silicosis: *short report*, **480**
Parkinson's disease, effects of dopaminergic stimulation on airway dynamics and respiratory muscle strength, **880P**
Passive smoking
does not change lung permeability acutely, **860P**
exposure in children, **801**, **861P**
relation to spirometric values in children, **850P**
respiratory illness and lung function in British children, **220P**
Patent foramen ovale, shunting through: *correspondence*, **575**
Peak expiratory flow
in children passively exposed and not exposed to cigarette smoke, circadian rhythm, **801**
diurnal variability, in CAO, **865P**
diurnal variation, different methods for calculating, **882P**
effect of number of readings a day on diurnal variation, **845P**
measurement, validity in assessing reversibility of airflow obstruction, **162**
meter, non-linearity, effect on calculation of diurnal variation, **891P**
variability, repeatability of measures, for community studies, **230P**
Peak flow measurement: *editorial*, **903**
Peak flow meter
and asthma drug prescribing, data analysis, **884P**
non-linearity, influence on recorded PEF variability, **891P**
in obstructive airways disease, comparison of use before and after 1 October 1990, **237P**
performance, changes after prolonged use, **890P**
portable, accuracy, **904**
Peak inspiratory flow rates in acute asthma, are they adequate for efficient use of a Turbohaler, **239P**
Pectus excavatum, and congenital bronchial atresia with regional emphysema: *short report*, **1082**
Pentoxifylline, infused, in ARDS model, lung injury and cardiopulmonary bypass, **244P**
Peribronchiolitis, clinicopathological features, **217P**
Peripheral T cell receptor Vα gene used in atopy and atopic asthma, restriction, **853P**
Pet ownership, and associated morbidity in asthma, **210P**
pH measurements, gastro-oesophageal reflux and asthma, **881P**
Pharmacotherapy in lung injury, **651**
Pharyngeal size during nasal positive airway pressure in sleep apnoea, effect of reduced expiratory pressure, **809**
Phosphoinositidase C isoforms, multiple, presence in bovine tracheal smooth muscle, **213P**
Photodynamic therapy, endoscopic, for malignant endobronchial obstruction, **251P**
Phrenic nerves, repetitive stimulation, in myasthenia gravis, **640**
Physiotherapy, before elective abdominal surgery, evaluation, **249P**
Plasma leakage, effects of bradykinin and histamine compared, **232P**
Plasma membrane receptors, modulation in fine tuning of cell behaviour, **563**
Platelet activating factor
induced bronchoconstriction and circulating white cell responses, failure of salmetrol to inhibit, **948**
induced bronchoconstriction and leucopenia are not inhibited by salmeterol, **255P**
and non-specific bronchial hyperresponsiveness, **255P**
Platelet aggregation factor, salivary, in acute severe asthma, acute myocardial infarction, and stable asthma, **870P**
Platelet kinetics in asthma with and without aspirin intolerance, **533**
Pleural abrasion
new method of pleurodesis: *correspondence*, **138**, **575**
Pleural adhesions, pneumothorax, and air transport: *short report*, **833**
Pleural biopsies, audit, argument for setting up pleural biopsy service, **849P**
Pleural effusion
amylase rich, analysis of amylase isoenzyme in differential diagnosis, **887P**
audit of clinical investigation, **734**
as manifestation of temporal arteritis: *short report*, **398**
Pleural empyema
microbiology, **850P**
secondary to pneumonia, thoracocentesis regimen versus tube drainage, **821**
Pleuroperitoneal shunts for malignant pleural effusion, long term follow up, **861P**
Plicatic acid induced histamine release from BAL cells, **214P**
Plombage, surgical, fatal mediastinal compression as late complication: *short report*, **321**
Pneumocystis carinii
DNA amplification from saline mouth rinse, **857P**
infection, latent, absence in post-mortem lung samples, **856P**
molecular genetic analysis shows close relationship to ustomycetous red yeast fungi, **856P**
polymerase chain reaction detection in asymptomatic HIV infection, **223P**
pneumonia, **305**
in AIDS, polymerase chain reaction and immunofluorescence compared, **857P**
atypical, **857P**
complicating low dose methotrexate treatment for rheumatoid arthritis: *correspondence*, **67**
in HIV antibody positive patients, diagnosis by simple outpatient assessments, **1005**
subclinical, in small cell lung cancer, **857P**
Pneumomagnetometry, for measurement of magnetic particles in the lung, **888P**
Pneumonia
acute bacterial and atypical, community acquired, Saudi Arabia, **115**
after stroke, **874P**
community acquired: *editorial*, **329**
blood CD4 and CD8 lymphocyte numbers, **253P**
criterion based audit, **874P**
induced sputum as diagnostic tool, **874P**
due to Q fever, antibiotic treatment, **276**
fulminant, *Aeromonas hydrophila*, in a fit young man: *short report*, **482**
nosocomial, in the intensive care unit, mechanisms and significance, **465**
pleural empyema secondary to, thoracocentesis versus tube drainage in treatment, **821**
Pneumonitis
acute, associated with low dose methotrexate for RA, **628**
after bone marrow transplantation, lung function measurements to predict risk, **421**
nilutamide associated, eight patients, **622**
Pneumothoraces, spontaneous
management, audit, **887P**
persistent air leak, optimum time of surgical intervention, **222P**
Pneumothorax
in pleural adhesions, and air transport: *short report*, **833**
secondary to septic pulmonary emboli, in tricuspid endocarditis: *short report*, **1080**
Pollution
respiratory effects, **885P**
and respiratory morbidity, how much do we accept? **391**; *correspondence*, **762**
Polyarteritis, microscopic, and idiopathic pulmonary haemosiderosis: *short report*, **988**
Polyethylene shrink wrapping, causing occupational asthma (paper wrapper's asthma): *short report*, **759**
Polymerase chain reaction
amplification of two mycobacterial DNA sequences, IS6110 and 65kDa antigen gene, in tuberculosis diagnosis, **690**
in rapid diagnosis of tuberculosis: *editorial*, **264**
in tuberculous pleurisy diagnosis, **265**
Polysomnography system, computerised, evaluation, **234P**
Positive expiratory pressure breathing, effect in cystic fibrosis: *correspondence*, **66**
Positron emission tomography
to measure regional structure-function correlations in chronic obstructive lung disease, **914**
for in vivo quantification of pulmonary beta-adrenoceptor density, **853P**
Post-thoracotomy, use of Flutter VRP1 device, **236P**
Posture, effects on flow-volume curves during normocapnia and hypercapnia in obstructive sleep apnoea, **524**
Poverty, and tuberculosis, **849P**
Pre-employment chest x ray films, for health service staff, who needs them, **877P**

Precipitins, and specific IgG antibody to *Aspergillus fumigatus*, in chest unit population, **48**
Prednisolone
"abruptly stopping" compared with "tailing off," in acute asthma, **228P**
short course, in chronic obstructive airways disease, bone turnover during, **418**; *correspondence*, **1084**
Pressurised metered dose inhaler technique, how good are general practitioners, **237P**
Procaterol induced bronchodilation, effects on cough receptor sensitivity to inhaled capsaicin and tartaric acid, **441**
Propofol sedation for outpatient bronchoscopy, improved recovery after, **246P**
Prostacyclin
inhaled, differential effect on airway calibre in hyperresponsive subjects, **872P**
intravenous, effects in severe chronic obstructive pulmonary disease, **893P**
Prostaglandin E_2, in protective effect of frusemide, **895P**
Prostaglandins, in regulation of active chloride transport, **233P**
Prostanoids, inhibitory, evidence of role in beneficial effects of frusemide for exercise induced asthma, **797**
Protease inhibitor phenotype, relation to serum elastin peptide concentration, working men, **937**
Pseudolung sounds, measurement of attenuation by animal lung and chest wall, **880P**
Pseudomonas aeruginosa
extrapulmonary sites, in adults with cystic fibrosis, **426**
infection, seasonal onset, and cystic fibrosis, **109**
mucoid, infection, in cystic fibrosis, role of alginate, **6**
pyocyanin from perturbs respiratory epithelium by intracellular redox cycling, **252P**
pyocyanin slows human ciliary beating via cyclic AMP dependent mechanism, **869P**
Pseudomonas cepacia
infection, increased incidence in adult cystic fibrosis centre, **866P**
serum IgG antibodies to, in adults with cystic fibrosis, **252P**
Psychosocial factors in brittle asthma, **209P**
Pulmonary
adenocarcinoma, primary, and alveolar atypical hyperplasia, clinicopathological study of 10 cases, **1041**
arteriovenous malformations, quantification of right to left shunt at rest and during exercise, **790**
aspergillosis, chronic necrotising, caused by *A niger* in a mildly immunocompromised host: *short report*, **570**
circulation, in acute lung injury, a new look, **743**
complications, after long term amiodarone treatment, **372**
disease, rural African hospital, **228P**
emboli, septic, pneumothorax secondary to, in tricuspid endocarditis: *short report*, **1080**
embolism, management, **825**
emphysema, detection and quantification by computed tomography: *editorial*, **1001**
endothelial permeability, three probe portable system for assessment, **893P**
function
in chronic renal failure, effects of dialysis and transplantation: *correspondence*, **763**
and symptoms in workers exposed to wood dust, **84**
heart disease, and abnormal right ventricular systolic and diastolic function, **847P**
Kaposi's sarcoma, in Africa, **730**
lymphangioleiomyomatosis, possible aetiological factors, **217P**
metastatic calcification, localised, associated with pulmonary artery obstruction, **174**
neoplasm, endobronchial actinomycosis mimicking: *short report*, **664**
sequelae of chlorine gassing, **236P**
surgery, prophylactic digitalisation, **41**
valvotomy, surgical closed, for critical pulmonary stenosis, implications for balloon valvuloplasty era, **179**
vascular smooth muscle, hypoxia induced relaxation, **224P**
Pure red cell aplasia and lymphadenopathy, associated with bronchocentric granulomatosis: *short report*, **131**
Pyocyanin from *P aeruginosa* perturbs respiratory epithelium by intracellular redox cycling, **252P**

Q
Q fever, causing pneumonia, antibiotic treatment, **276**

R
Radiographic chemical sensitisation in a radiographer, **229P**
Radiotherapy, endobronchial, effect on tumour morphology and lung function, **250P**
Renal haemodynamics, short term effect of oxygen, in hypoxaemic chronic obstructive airways disease, **550**
Renin, secretion, effects of acute and chronic hypoxia, **846P**
Residual volume and total lung capacity, predictive equations calculated from radiographs, random sample, Michigan population, **519**
Respiratory disability, severe, portable liquid oxygen and exercise ability, **781**
Respiratory distress syndrome, tumour necrosis factor in bronchoalveolar secretions, dexamethasone treatment, infants, **44**
Respiratory function laboratories and technicians, British Thoracic Society survey, **848P**
Respiratory insufficiency, chronic, nasal ventilation to facilitate weaning, **715**
Respiratory muscle
function in patients with severe scoliosis, **848P**
strength in chronic asthma, **849P**
training, in chronic airflow limitation, controlled trial, **598**
Respiratory obstruction from mediastinal bronchogenic cyst, recurrent: *short report*, **660**
Respiratory symptoms
in childhood, time trends over 24 year period, **853P**
postal survey, young adults, Bergen, Norway, **884P**
and self reported asthma, prevalence, student population, **209P**
Respiratory workload, assessment against provision of respiratory physicians, **222P**
Resting energy expenditure
estimation in chronic lung disease, comparison of ventilated hood and mouthpiece systems, **864P**
TNFα, and cachexia in cystic fibrosis, **868P**
Reviewers used from 1 October 1991 to 30 September 1992, **1088**
Rheumatoid arthritis
bronchial reactivity and airways obstruction, **854P**
low dose methotrexate treatment, *Pneumocystic carinii* pneumonia complicating: *correspondence*, **67**
Rhodococcus equi, endobronchial mass with lung abscess, and AIDS: *short report*, **62**
Right to left shunt, quantification at rest and during exercise, in pulmonary arteriovenous malformations, **790**
Right ventricular hypertrophy in chronically hypoxic rats is associated with increased IGF-1 gene expression, **858P**

S
Salbutamol
and asthma deaths, New Zealand, 1969–76, case-control study, **210P**
and BRL38227 compared, in asthma, **254P**
does not influence incidence of chest infection after upper abdominal surgery in high risk patients, **249P**
effect of addition of increasing doses to salmeterol, **855P**
and fenoterol compared, **882P**
cardiovascular and metabolic effects, **882P**
clinical study, **882P**
nebulised
in acute asthma, oxygen saturation changes after, **220P**
and adrenaline, comparison of bronchodilator potencies and effects on bronchial reactivity in mild asthmatic subjects in vivo, **874P**
dose-response relation against bronchoconstriction induced by methacholine, **873P**
and oxitropium bromide, effect on oxygen desaturation in COPD, **211P**
Salmeterol
effect of six week course on bronchial reactivity, **230P**
failure to inhibit circulating white cell responses and bronchoconstriction induced by platelet activating factor, **948**
inhaled, chronic dosing in exercise induced asthma, **255P**
metered dose inhaler, paradoxical bronchoconstriction associated with, **254P**
PAF induced bronchoconstriction and leucopenia are not inhibited by, **255P**
v salbutamol, in moderate asthma, cost effectiveness compared, **883P**
Salmeterol xinafoate in asthma
compared with nedocromil sodium, **883P**
compared with salbutamol, **883P**
Sarcoidosis
effects of steroid on macrophage lymphocyte interactions, **215P**
IL-8 mRNA expression, **215P**
LeuCAM adhesion proteins, **894P**
pulmonary, B lymphocyte accumulations, **964**
Sclerotherapy, oesophageal, chylothorax as complication: *short report*, **134**
Scoliosis, severe, respiratory muscle function, **848P**
Sensorimotor impairment following prolonged ventilation with isoflurane and vecuronium for acute severe asthma, reversible: *short report*, **1078**
Shoulder pain and breathlessness, **216P**
Shunting through a patent foramen ovale: *correspondence*, **575**
Shuttle walking test of disability, in patients with chronic airways obstruction, development, **1019**
Silicosis, retroperitoneal, mimicking pancreatic carcinoma, in Alpine miner with chronic lung silicosis: *short report*, **480**
Sleep apnoea
ANP release, **235P**
induction with negative pressure ventilation, in chronic obstructive lung

disease, **612**
obstructive, neck circumference and other clinical features in diagnosis, **101**
phase angle changes and breathing, **879P**
see also Obstructive sleep apnoea
Sleep and breathing in obesity, effects of fluoxetine, **235P**
Sleep disordered breathing
and Mesam 4, **234P**
mild to moderate, 4-5 year old children, daytime behaviour, **220P**
Sleep disturbance, due to respiratory symptoms, **855P**
Small cell lung cancer
relapse, treatment with initial combination chemotherapy carboplatin, etoposide, and epirubicin, **369**: *correspondence*, **668**
subclinical *Pneumocystis carinii*, **857P**
Smoke, cigarette, circadian rhythm of peak expiratory flow in children passively exposed and not exposed to, **801**
Smokers
airway immunopathology, bronchus associated lymphoid tissue, **886P**
integrity of alveolar-capillary barrier and alveolar surfactant system, **603**
and non-smokers, intra-alveolar macrophage numbers, **437**
Smoking
children, the problem and the way forward: *editorial*, **485**
current smoking, leanness, and physical inactivity, interaction between, in prediction of hip fracture, **861P**
passive, lung function, and respiratory illness, British children, **220P**
relation to serum elastin peptide concentration, working men, **937**
and smoking habit, hospital staff attitudes, **850P**
see also Passive smoking
Snorers, breath holding time, **880P**
Snores, frequency content in humans, **879P**
Snoring, habitual, with and without obstructive sleep apnoea, importance of cephalometric variables, **157**
Sodium
dietary, effect on severity of bronchial asthma, **360**
low, diet, effect on asthma in general practice, **256P**
Sodium metabisulphite
and exercise induced asthma, cross refractoriness between, **873P**
induced bronchoconstriction, attenuated by carbonic anhydrase inhibitor, **234P**
Sodium retention, and hypoxia, in chronic obstructive pulmonary disease, **847P**
Solitary pulmonary nodule, bronchography complementing fibreoptic bronchoscopy to evaluate, **886P**
Somatic gene therapy, for hereditary respiratory diseases, recent advances, **315**
Somnofluoroscopy, in airway assessment, obstructive sleep apnoea, **150**
Sonography, endobronchial, feasibility and preliminary results: *new techniques*, **565**
Spinal tuberculosis, unusual, after adequate chemotherapy for lymph node tuberculosis in an immunocompetent man: *short report*, **986**
Sputum
induced
cell counts, to investigate airway inflammation in asthma, **25**
as diagnostic tool in community acquired pneumonia, **874P**
method of assessing airway inflammation in asthma, **212P**
induction, in cytological diagnosis of bronchogenic carcinoma, **887P**
sol phase proteins, and elastase activity, in clinically stable bronchiectasis, **88**
Squamous cell carcinoma of the lung, nucleolar organiser regions as marker of growth rate, **778**
Stents expandable metal
for tracheal obstruction, permanent or temporary, cautionary tale: *short report*, **757**
insertion under direct vision via a fibreoptic bronchoscope, preliminary experience, **250P**
Steroid(s)
dependent asthma, auranofin treatment, **349**; *correspondence*, **992**
effects on macrophage lymphocyte interactions in sarcoidosis, **215P**
inhaled, preterm infants with respiratory symptoms at follow up, **910**
tapering, in acute asthma, **845P**
therapy, and airway complications following pulmonary transplantation, **248P**
see also Corticosteroids
Streptococcus pneumoniae
cell associated, and stimulation of oxidative response of neutrophils, **870P**
interference with oxidative response of neutrophils, and oxidation of cytochrome C, **869P**
producing respiratory burst inhibitor, characterisation, **869P**
susceptibility to killing by reactive oxygen species, **869P**
Stroke, pneumonia after, **874P**
Sweet's syndrome, and neutrophilic alveolitis: *short report*, **572**
Systemic lupus erythematosus, respiratory disease in, muscle biopsy specimens, **957**
Systemic sclerosis, high resolution computed tomography as predictor of lung histology, **508**; correction, **738**

T
T cell recognition of antigen, and lung diseases, **127**
Tartaric acid, inhaled, cough receptor sensitivity to, effects of methacholine induced bronchoconstriction and procaterol induced bronchodilation, **441**
Technetium-99m DTPA
lung clearance
diagnostic value in *P carinii* pneumonia in AIDS: *correspondence*, **138**
evaluation, **888P**
persistent alveolar increased permeability to in advanced HIV infection: *correspondence*, **575**
Temazepam, effect on tracheobronchial mucus clearance, **298**
Temporal arteritis, pleural effusion as manifestation: *short report*, **398**
Terbutaline
and budesonide, effects on bronchial reactivity to allergen in mild atopic asthma, **231P**
infused, with and without oral, in brittle asthma, side effects, **256P**
inhaled
sex differences in hypokalaemic, chronotropic, and electrocardiographic effects, **882P**
sex differences in hypokalaemic and electrocardiographic effects, **1056**
and ipratropium, low and high doses, bronchodilator reversibility, in COPD, **255P**
plasma, HPLC measurement, brittle asthma, **884P**
Terfenadine, in nocturnal asthma, **230P**
Tetrachloroisophthalonitrile, inducing asthma: *short report*, **760**
Textile workers, symptom free, repeatability of histamine bronchial challenge as measured by dose response, **889P**
Theophylline plasma estimation, Acculevel and HPLC compared, **255P**
Thigh muscle strength in chronic asthma, **849P**
Thoracic duct cyst in the mediastinum: *short report*, **325**
Thoracocentesis regimen versus tube drainage in pleural empyema secondary to pneumonia, **821**
Thorax, annual report October 1991-September 1992, **1087**
Three probe portable system for pulmonary endothelial permeability assessment, **893P**
Thrombocytopenia, immune, complicating pulmonary tuberculosis: *short report*, **396**
Thrombolytic treatment for myocardial infarction, oesophageal dissection after: *short report*, **835**
Tine testing HIV positive patients, **877P**
Total lung capacity and residual volume, predictive equations calculated from radiographs, random sample, Michigan population, **519**
Trachea
epithelium, endothelin, vasopressin, and substance P like immunoreactivity, rabbit, **1044**
lesions, obstructive, endoscopic Nd YAG laser treatment, **250P**
microbial flora, during intubation for upper abdominal surgery, **818**
obstruction, expandable metal stents, permanent or temporary, cautionary tale: *short report*, **757**
Tracheo-oesophageal fistula, and oesophageal atresia, repaired, lung function abnormalities, **1030**
Tracheobronchial clearance
acute effect of inhaled bradykinin, normal humans, **952**
modulation by inhaled bradykinin and [desArg9]-bradykinin in normal subjects, **860P**
Tracheobronchial epithelium dysplasia, expression of proliferating cell nuclear antigen, **249P**
Tracheobronchial mucus clearance, effect of temazepam, **298**
Tracheobronchial obstruction, treatment with bronchoscopic diathermy resection, **886P**
Transbronchial lung biopsy, multiple, complications following, **886P**
Transcutaneous oxygen tension, and repeatability of methacholine challenge in asthmatic children, **804**
Transdiaphragmatic sniff pressure, with catheter mounted pressure transducers, normal range, **881P**
Transepithelial potential difference, effect of pulmonary infection, **233P**
Transoesophageal echocardiography, in diagnosis of refractory hypoxaemia after pneumonectomy: *short report*, **60**; *correspondence*, **575**
Transplantation, and pulmonary function in chronic renal failure: *correspondence*, **763**
Transtracheal oxygen delivery: *new techniques*, **57**
Trauma, multiple
endotoxin, antiendotoxin core antibodies, and oxygen requirement after, **245P**
neutrophil elastase levels and oxygen requirement after, **245P**
Tuberculin positive children: *editorial*, **768**
Tuberculosis
and AIDS, is the "white plague" up and coming? **223P**

among health service employees, **224P**
audit of standard contact procedure, **227P**
calculated annual risk of infection, south west Ireland 1983-90, **228P**
contact tracing
are British Thoracic Society guidelines still appropriate: *short report*, **984**
results, Blackburn 1982-90, **224P**
diagnosed in contact clinic, Leeds TB survey 1991, **876P**
in the elderly, presentation and outcome, Leeds tuberculosis survey 1991, **223P**
extrapulmonary, Lothian 1980-1989, delay from start of symptoms to diagnosis, **877P**
extrathoracic, presentation and outcome, Leeds TB survey 1991, **877P**
genitourinary, occurs proportionately less than expected in Indian subcontinent ethnic population in the UK, **876P**
immune thrombocytopenia complicating: *short report*, **396**
lymphocytes and subsets in blood, lavage and pleural fluid, **513**: *correspondence*, **1085**
M tuberculosis specific antibody measurement, clinical value, **270**
national survey of notifications, England and Wales, 1988, **770**
notification, number of cases never reported, **1015**
PCR amplification of IS611 0 DNA, **876P**
and poverty, **849P**
prediction of later breakdown and positive Heaf test reaction, Asian schoolchildren, **776**
pseudo-outbreak, paediatric oncology ward, **220P**
rapid diagnosis, new approaches: *editorial*, **264**
school microepidemic: *correspondence*, **208**
side effects of therapy in the elderly, **875P**
spinal, unusual, after adequate chemotherapy for lymph node tuberculosis in an immunocompetent man: *short report*, **986**
standardised notification ratio, simple way of assessing service needs, **875P**
in the third world: *correspondence*, **327**
three drug regimen as best treatment, **224P**
who treats and how effectively, Leeds tuberculosis survey 1991, **222P**
yield from contact tracing, Birmingham 1987-9, **875P**
Tuberculous meningitis, management: *editorial*, **577**
Tuberculous pleurisy, polymerase chain reaction in mycobacterial DNA detection, **265**
Tumour markers in bronchial lavage fluid in lung cancer, **887P**
Tumour necrosis factor, in bronchoalveolar secretions, respiratory distress syndrome, dexamethasone treatment, infants, **44**
leukotrienes, and airflow obstruction in cystic fibrosis, **868P**
resting energy expenditure and cachexia in cystic fibrosis, **868P**
synthesis by bronchial epithelial cells, effect of NO_2, **245P**
Turbohaler
device to show patient efficiency, **889P**
and peak inspiratory flow rates in acute asthma, **239P**

U
Ultrasound guided percutaneous cutting biopsy for diagnosis of pulmonary consolidations of unknown aetiology, **457**
Upper abdominal surgery, microbial flora of trachea during intubation, **818**
Upper airway obstruction, abnormal movement of arytenoid region as cause: *short report*, **840**
Ustomycetous red yeast fungi, molecular genetic analysis shows close relationship to *Pneumocystis carinii*, **856P**

V
V:Q scans, intermediate, can multivariate analysis reduce number, **236P**
Vascular cells, effect of heparin, **634**
Vascular leakage, effect of local hyperthermia, **232P**
Vasoactive substances, within tracheal epithelium, rabbit, **1044**
Vasopressin, secretion, effects of acute and chronic hypoxia, **846P**
Vecuronium, and isoflurane, for acute severe asthma, sensor motor impairment following, reversible: *short report*, **1078**
Ventilation
collateral, and gas exchange, normal lung, **211P**
effect on avian antigen concentration in an animal laboratory, **889P**
-perfusion relationships, after single lung transplantation for emphysema, **248P**
sustained maximum voluntary, causes diaphragm fatigue, **858P**
Ventilometer, hand held spirometer, evaluation, **229P**
Vertebral fractures in steroid dependent asthma and involutional osteoporosis: a comparative study: *correspondence*, **207**
Vertebral osteomyelitis, presenting with pleuritic chest pain and bilateral pleural effusions: *short report*, **395**
Viral infections, role in lung disease of cystic fibrosis: *editorial*, **69**
Visceral pleural biopsy, percutaneous, with fenestrated cup biopsy forceps: *technical note*, **753**
Vitamin A and E concentrations in cystic fibrosis, **867P**
Vitronectin receptor mediates macrophage phagocytosis of apoptotic eosinophils, **240P**
Vocal cord palsy, right, at bronchoscopy, **247P**

W
Walking tests
in severe airflow limitation, **211P**
shuttle and six minute, comparison, **236P**
Water retention, and hypoxia, in chronic obstructive pulmonary disease, **846P**
Web 2086, no steroid sparing effect in asthmatic patients requiring inhaled corticosteroids, **871P**
Wedge-bellows spirometer tubes, microorganisms in, **862P**
Wegener's granuloma
1975-1985 clinical data, **217P**
histological features, **217P**
prognosis, treatment and cause of death, **217P**
Weightlifting exercise, and chronic airflow limitation, trial, **70**
Wheeze in childhood
airway function 25 years later, **221P**
educational attainment and employment 25 years later, **253P**
Wilms's tumour, childhood, exercise capacity in survivors, **220P**
Wood dust, pulmonary function and symptoms of exposed workers, **84**
Wool mills, macrophage aggregates in rats exposed to dust from air, mechanism of formation, **213P**
Wright pocket and mini-Wright peak flow meters, comparison, **230P**

Y
Young's syndrome, mucociliary function, ciliary ultrastructure, and ciliary orientation, **184**
